## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a grinding sludge compacting machine, classified in class 100, subclass 126.
- II. Claims 4-6, drawn to a press controller, classified in class 700.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention the press controller of Group II has separate utility such as use with any press and is not limited to the grinding sludge compacting machine of Group I for its operation, accordingly, the inventions are separable and distinct. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different search requirements (i.e., the search required for Group I is not required for Group II) and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
